Licensee’s obligations

- 8.3 The licensee must comply with a Last Resort Supply Direction.

- 8.5 Within a reasonable period of time after receiving a Last Resort Supply Direction, the licensee must send a Notice to each of the premises specified or described in the Last Resort Supply Direction to inform each Customer:
- (a) that the other supplier stopped supplying electricity to his premises with effect on and from the date on which the Last Resort Supply Direction had effect;

Condition 21. Fuel mix disclosure arrangements

- 21.1 The purpose of this condition is to require the licensee to publish specified information about:
- (a) fuel sources from which the electricity supplied by it has been generated; and
 - (b) the environmental impact of generating electricity from those fuel sources.

Licensee's duty to publish

- 21.2 The duty to publish under this condition arises where the licensee has been a supplier of electricity for the whole of any Disclosure Period.
- 21.3 Where the duty arises, the licensee must, during the period of 12 months beginning on 1 October after the end of a Disclosure Period:
- (a) provide the Data relating to that Disclosure Period to each customer to whom it sends a Bill or statement of account, by including that Data on or with at least one Bill or statement of account sent to the customer during those 12 months; and
 - (b) include the Data relating to that Disclosure Period in its Promotional Materials issued during those 12 months.

Data for publication

- 21.4 The Data are, in respect of each Disclosure Period:
- (a) the contribution, expressed as a percentage, made by each Energy Source to the Total Amount of Electricity purchased for supply by the licensee; and
 - (b) the environmental impact of the Total Amount of Electricity purchased for supply by the licensee, expressed as the quantity in grams of carbon dioxide emitted and of radioactive waste produced per kWh of electricity.

21.5 The Data are to be calculated consistently with paragraphs 21.10 to 21.13.

Publishing Data

- 21.6 The licensee must indicate clearly, when publishing the Data under this condition:
- (a) the Disclosure Period to which those Data relate; and

Note: Consolidated conditions are not formal Public Register documents and should not be relied on.

Electricity suppliers Licence: Standard Conditions - Consolidated to 01 December 2012

- (b) that the Data relate to the Total Amount of Electricity purchased for supply by the licensee.
- 21.7 Each item of Data referred to in sub-paragraph 21.4(a), if it is not zero, must be rounded either to the nearest whole percentage point or, if it is less than one percent, to the nearest single decimal place.
- 21.8 The Data referred to in sub-paragraph 21.4(b) may be provided by reference to an existing source such as a web page, so long as that reference is sufficiently clear to enable the source to be easily accessed and that the purpose for which the reference is provided is stated on or with the Bill or statement of account and on the Promotional Materials.
- 21.9 During the last two months of any period of 12 months beginning on 1 October after the end of a Disclosure Period, the licensee may include in its Promotional Materials the Data relating to the most recent Disclosure Period instead of the Data referred to in paragraph 21.3.

Evidence for contributions

- 21.10 An Energy Source must be treated as having contributed to the Total Amount of Electricity purchased for supply by the licensee where, at midday on 1 July immediately after the end of a Disclosure Period, the licensee holds:
 - (a) for Renewable Energy Sources, a Guarantee of Origin relating to its generation in that period or, up to and including 1 July 2006, a Generator Declaration relating to that period and indicating a Renewable Energy Source;
 - (b) for coal, gas, a nuclear source or any Other Energy Source, a Generator Declaration relating to that period and indicating that Energy Source; and
 - (c) for electricity that is purchased by way of an electricity exchange or imported from an undertaking outside the Community, if aggregated figures are provided by that exchange or undertaking, those figures that identify the amount of electricity produced from a particular Energy Source.
- 21.11 If the licensee does not hold evidence referred to in paragraph 21.10 in respect of any part of the electricity which it has purchased for supply during the Disclosure Period, it must apportion that electricity between Energy Sources in the percentages provided for under the Fuel Mix Disclosure Data Table.
- 21.12 The licensee may only rely on a Guarantee of Origin issued outside Great Britain or on a Generator Declaration from a generator outside Great Britain if:

Note: Consolidated conditions are not formal Public Register documents and should not be relied on.

Electricity suppliers Licence: Standard Conditions - Consolidated to 01 December 2012

- (a) it holds evidence that the electricity referred to in the Guarantee of Origin or Generator Declaration has been supplied in Great Britain; and
- (b) that Guarantee of Origin or Generator Declaration has not been used outside Great Britain as evidence of fuel mix.

Calculating the environmental impact

21.13 The Data referred to in sub-paragraph 21.4(b) must be calculated as follows:

- (a) for carbon dioxide, by multiplying the percentage contribution of each Energy Source calculated under sub-paragraph 21.4(a) by the CO₂ emission rate for that Energy Source set out in the Fuel Mix Disclosure Data Table and then adding together the results of that calculation for all Energy Sources; and
- (b) for radioactive waste, by multiplying the percentage contribution of nuclear generation calculated under sub-paragraph 21.4(a) by the rate of radioactive waste set out in the Fuel Mix Disclosure Data Table.

Information for Authority

Customers in payment difficulty

27.5 The licensee must offer each of the services set out in paragraph 27.6 when it becomes aware or has reason to believe that a Domestic Customer is having or will have difficulty paying all or part of the Charges for the Supply of Electricity.

27.6 The services referred to in paragraph 27.5 are:

 - (iii) by using a Prepayment Meter, where it is safe and reasonably practicable in all the circumstances of the case for the Domestic Customer to do so and where any instalments to be paid are calculated in accordance with paragraph 27.8; and
- (b) the provision of information about how the Domestic Customer could reduce the Charges for the Supply of Electricity that he must pay by using the electricity supplied to his premises more efficiently.

27.7 If a Domestic Customer, having agreed to make payments for Charges for the Supply of Electricity using the service referred to in sub-paragraph 27.6(a)(i), is no longer in receipt of social security benefits from which payments can be deducted at source, the licensee must offer the services referred to in sub-paragraph 27.6(a)(ii) and 27.6(a)(iii).

- (a) relevant information provided by third parties, where it is available to the licensee; and

27.9A For the purposes of conditions 27.9, 27.10, 27.11 and 27.11A, Disconnection includes:

- (a) Credit Limiting where:
 - (i) it amounts to stopping the supply to the Domestic Premises; and
 - (ii) the Domestic Customer does not pay Charges for the Supply of Electricity by using a Prepayment Meter; and
- (b) Load Limiting where:
 - (i) the supply to the Domestic Premises is significantly constrained; and

27.16 Where any Credit has accumulated under a Domestic Supply Contract and the relevant Domestic Customer requests that the licensee do so, the licensee must, save where it is fair and reasonable in all the circumstances for the licensee not to do so, refund, in a timely manner any Credit which has accumulated under that Domestic

2. To whom obligation is owed

- 2.1 The Mandatory FIT Licensee shall, subject to the terms of the FIT Scheme, be obliged to accept a request for FIT Payments from a FIT Generator as regards an Accredited FIT Installation:
- 2.1.1 which occupies a Site in relation to which that Mandatory FIT Licensee is the Relevant Electricity Supplier; or
- 2.1.2 which occupies a Site –
- (a) in relation to which that Mandatory FIT Licensee is not the Relevant Electricity Supplier; and
- (b) which is supplied by an Electricity Supplier which is not itself a Mandatory FIT Licensee; or
- 2.1.3 which occupies a Site which does not receive a supply of electricity from any Electricity Supplier;
- 2.2 A Mandatory FIT Licensee may accept a request for FIT Payments from a FIT Generator as regards any other Accredited FIT Installation.

3. Payment of FIT

- 3.1 The Mandatory FIT Licensee shall be obliged to make FIT Payments as regards an Accredited FIT Installation only in the event the following conditions are satisfied:
- 3.1.1 The Mandatory FIT Licensee is satisfied that the FIT Generator is not registered on the Central FIT Register as being in receipt of FIT Payments from another FIT Licensee as regards that Accredited FIT Installation;
- 3.1.2 the Mandatory FIT Licensee must have access to or have received from the FIT Generator or Nominated Recipient the Generation Meter Readings, Export Meter Readings or Deemed Export Readings required, as applicable, in order to calculate the FIT

8.2 The Mandatory FIT Licensee may, and must if directed by the Authority, reduce or withhold FIT Payments from a FIT Generator or take steps to recoup FIT Payments:

8.2.1 when it is identified (either through notification from the Authority or following an internal review by the Mandatory FIT Licensee) that there has been an error by the:

- (a) Mandatory FIT Licensee; or
- (b) FIT Generator; or
- (c) Authority,

which has led that Mandatory FIT Licensee to make FIT Payments in excess of entitlement;

8.2.2 when the Authority has established that a FIT Generator has received FIT payments to which it is not entitled and has noted this fact in the Central FIT Register,

except that it is not required to take steps to recoup incorrect FIT Payments made by another FIT Licensee.

8.3 Where the Authority informs the Mandatory FIT Licensee that the accreditation of an installation as an Accredited FIT Installation has been suspended or withdrawn, the Mandatory FIT Licensee shall not make any further FIT Payments in respect of that installation until such time as notified by the Authority that the suspension has ended or the withdrawal has been revoked, except insofar as otherwise directed by the Authority to make a reduced FIT Payment.

ANNEX 5

GENERATION TARIFFS FOR SOLAR PHOTOVOLTAIC INSTALLATIONS: APPLICATION OF HIGHER, MIDDLE AND LOWER RATES

1. This Annex applies in relation to solar photovoltaic Eligible Installations which are of a description, and have a Tariff Date, for which higher, middle and lower rates of Generation Tariffs are specified in the applicable FIT Payment rate table.
2. In this paragraph and the following paragraphs-
 - 2.1 the expressions “asset rating”, “dwelling” and “energy performance certificate”-
 - (a) in relation to a building in England or Wales, have the same meaning as in the Energy Performance of Buildings (Certificates and Inspections) (England and Wales) Regulations 2007;
 - (b) in relation to a building in Scotland, have the same meanings as in the Energy Performance of Buildings (Scotland) Regulations 2008, subject to paragraph 7;
 - 2.2 the following expressions have the same meanings as in the FIT Order-
 - “community energy installation”;
 - “school installation”;
 - 2.3 “energy efficiency rating” means an asset rating which is described on an energy performance certificate as an energy efficiency rating;
 - 2.4 “rating band” means the band to which an asset rating is assigned, as shown on an energy performance certificate by a letter from A to G;
 - 2.5 “relevant building” means a roofed construction having walls, for which energy is used to condition the indoor climate, other than such a building for which an energy performance certificate cannot be issued; and a reference to a relevant building includes a reference to part of such a building which has been designed or altered to be used separately;
 - 2.6 “relevant installation” means a solar photovoltaic Eligible Installation described in paragraph 1.
3. The lower rate applies to a relevant installation if-
 - 3.1 the Energy Efficiency Requirement applies in relation to that installation; and
 - 3.2 on the installation’s Eligibility Date, that requirement is not satisfied.
4. The Energy Efficiency Requirement applies in relation to a relevant installation if that installation is wired to provide electricity to one or more relevant buildings.

Note: Consolidated conditions are not formal Public Register documents and should not be relied on.

Electricity suppliers Licence: Standard Conditions - Consolidated to 01 December 2012

5. Where the Energy Efficiency Requirement applies in relation to a relevant installation, it is satisfied if an appropriate EPC for a relevant building to which the installation is wired as mentioned in paragraph 4 certifies that the building has a qualifying asset rating.
6. For the purposes of paragraph 5-
 - 6.1 an appropriate EPC, in relation to a relevant building to which a relevant installation is wired as mentioned in paragraph 4, is an energy performance certificate for that building which-
 - (a) was issued on or before, but not more than 10 years before, the Eligibility Date of the installation; and
 - (b) was, on the Eligibility Date of the installation, the most recently issued energy performance certificate for that building; and
 - 6.2 a qualifying asset rating is-
 - (a) for a dwelling, an energy efficiency rating within rating bands A to D;
 - (b) for a building which is not a dwelling-
 - (i) an asset rating within rating bands A to d, unless sub-paragraph (ii) applies;
 - (ii) an asset rating within rating bands A to G, if the relevant installation is a community energy installation or a school installation and, in the case of an installation with a declared net capacity of 50kW or less, has been pre-registered in accordance with the FIT Order.
7. If a recommendations report accompanying an appropriate EPC for a relevant building in Scotland which is not a dwelling specifies what the asset rating of the building would be if it was calculated according to the methodology by which asset ratings for buildings of that kind are calculated in England and Wales (an “England and Wales equivalent asset rating”), then for the purposes of paragraph 6.2 the asset rating of the building is its England and Wales equivalent asset rating.
8. The middle rate applies to a relevant installation from its Tariff Date if-
 - 8.1 either-
 - (a) the Energy Efficiency Requirement does not apply in relation to the installation; or
 - (b) the Energy Efficiency Requirement applies in relation to the installation, and, on the installation’s Eligibility Date, that requirement is satisfied; and
 - 8.2 paragraph 9 applies.

Note: Consolidated conditions are not formal Public Register documents and should not be relied on.

Electricity suppliers Licence: Standard Conditions - Consolidated to 01 December 2012

9. This paragraph applies if, at the date on which a request for accreditation of the relevant installation is received by the Authority or a FIT Licensee-
 - 9.1 the FIT Generator for the relevant installation and any persons who are Connected Persons in relation to the FIT Generator (taken together) are, or have applied to be, the FIT Generator or Nominated Recipient for 25 or more other solar photovoltaic Eligible Installations on different Sites; or
 - 9.2 the Nominated Recipient for the relevant installation (if there is one) and any persons who are Connected Persons in relation to the Nominated Recipient (taken together) are, or have applied to be, the FIT Generator or Nominated Recipient for 25 or more other solar photovoltaic Eligible Installations on different Sites.
10. Where notice is given to the Authority or a FIT Licensee of a change to the identity of the FIT Generator, or the nomination of a new Nominated Recipient, the middle rate applies to the relevant installation from the date on which the change took place or the nomination takes effect if-
 - 10.1 the higher rate previously applied to the installation; and
 - 10.2 paragraph 11 applies.
11. This paragraph applies if, at the date on which notice of such a change or nomination is received by the Authority or a FIT Licensee, the new FIT Generator or Nominated Recipient (as the case may be) and any persons who are Connected Persons in relation to that person (taken together) are, or have applied to be, the FIT Generator or Nominated Recipient for 25 or more other solar photovoltaic Eligible Installations on different Sites.
12. The higher rate applies to a relevant installation if neither the lower rate nor the middle rate applies to it.
13. The tariff applying to a relevant installation cannot change-
 - 13.1 from the lower rate to the middle rate or the higher rate; or
 - 13.2 from the middle rate to the higher rate.
